SCHEDULE 5: Data Retention Policy

Introduction

This schedule sets out the obligations of the Company regarding retention of personal data collected, held, and processed by the Company in accordance with EU Regulation 2016/679 General Data Protection Regulation (“GDPR”).

Aims and Objectives

The primary aim of this Schedule is to set out limits for the retention of personal data and to ensure that those limits, as well as further data subject rights to erasure, are complied with. By extension, this Schedule aims to ensure that the Company complies fully with its obligations and the rights of data subjects under the GDPR.

In addition to safeguarding the rights of data subjects under the GDPR, by ensuring that excessive amounts of data are not retained by the Company, this Schedule also aims to improve the speed and efficiency of managing data.

Data Disposal

Upon the expiry of the data retention periods set out in the table below of this Schedule, or when a data subject exercises their right to have their personal data erased, personal data shall be deleted, destroyed, or otherwise disposed of as follows:

- Personal data stored electronically (including any and all backups thereof) shall be deleted securely;
- Special category personal data stored electronically (including any and all backups thereof) shall be deleted securely;
- Personal data stored in hardcopy form shall be shredded;
- Special category personal data stored in hardcopy form shall be shredded.

Data Retention

- As stated above, and as required by law, the Company shall not retain any personal data for any longer than is necessary in light of the purpose(s) for which that data is collected, held, and processed.
- Different types of personal data, used for different purposes, will necessarily be retained for different periods (and its retention periodically reviewed), as set out below.
- When establishing and/or reviewing retention periods, the following shall be taken into account:
 - The objectives and requirements of the Company;
 - The type of personal data in question;
 - The purpose(s) for which the data in question is collected, held, and

processed;

- The Company's legal basis for collecting, holding, and processing that data; and
- The category or categories of data subject to whom the data relates.
- If a precise retention period cannot be fixed for a particular type of data, criteria shall be established by which the retention of the data will be determined, thereby ensuring that the data in question, and the retention of that data, can be regularly reviewed against those criteria.
- Notwithstanding the following defined retention periods, certain personal data may be deleted or otherwise disposed of prior to the expiry of its defined retention period where a decision is made within the Company to do so (whether in response to a request by a data subject or otherwise).
- In limited circumstances, it may also be necessary to retain personal data for longer periods where such retention is for archiving purposes that are in the public interest, for scientific or historical research purposes, or for statistical purposes. All such retention will be subject to the implementation of appropriate technical and organisational measures to protect the rights and freedoms of data subjects, as required by the GDPR.
